

Precision Machined Metal Parts

These precision machined metal parts are suitable for various mechanical applications requiring high tolerance and durability. The components feature precise threading and smooth surface finishes.

Product Overview

High-tolerance metal components designed for mechanical and assembly applications.

Precision Machined Metal Components

These precision-engineered metal parts are designed for demanding mechanical applications where dimensional accuracy and reliable connections are critical. Manufactured to exacting standards, these components offer excellent durability and performance for assembly processes. The parts are suitable for a wide range of industrial uses, ensuring high-quality results for your manufacturing or maintenance needs.

General Information

Place of Origin	Zhejiang, China (Mainland)
Model Number	machining parts

Commercial Terms

Supply Ability

100000 Pieces

Monthly Supply

Price Range	0.2 - 9 USD / Piece
Minimum Order Quantity	1000 Pieces

Logistics & Payment

Shipping Port	Ningbo
Delivery Time	25 days
Payment Terms	L/C, T/T
Packaging	Common export carton
