

Precision Measurement Instrument Set

This set includes a variety of precision instruments for accurate measurements. It features laser levels, digital calipers, micrometers, and ultrasonic distometers.

Overview

Precision Measurement Instrument Set

This comprehensive set of precision measuring instruments is designed for high-accuracy industrial and construction applications. The collection includes advanced tools such as laser levels, electronic digital calipers, electronic digital outside micrometers, and ultrasonic distometers. Each instrument is engineered to deliver reliable, high-resolution dimensional readings and distance measurements, ensuring professional-grade accuracy for every task.

Instrumentation Details

Included Instruments

- Laser Spirit Level
- Electronic Digital Caliper
- Electronic Digital Outside Micrometer
- Ultrasonic Distometer with Laser Indicator

Measurement Capabilities

Internal Measurement, External Measurement, Non-contact Distance Measurement, High-resolution Dimensional Reading

Features

Key Features

Digital Display • Laser Guidance • Tripod Mountable • Precision Engineering
