

Precision Metal Components and Cutting Tools

This collection features precision-engineered metal components and cutting tools. It includes brass fixtures and metal cutting tools, suitable for plumbing, decorative hardware, machining, and metalworking.

Product Overview

Precision Engineering Solutions

This collection features a versatile range of precision-engineered metal components and high-performance cutting tools designed for demanding industrial applications. The assortment includes durable brass fixtures such as faucet handles and escutcheons, ideal for plumbing and decorative hardware needs. Complementing these are industrial-grade cutting tools, including drill bits and milling cutters, engineered for rigorous machining and metalworking processes.

Material & Composition

Primary Material

Brass Alloy

Key Properties

Corrosion Resistant, High Durability, Precision Machined

Component Types

Plumbing & Decorative Components

- Faucet Handles
- Escutcheons
- Soap Dish

Machining Tools

Cutting Tool Range

- Drill Bits
- Milling Cutters
- Indexable Inserts

Suitable Applications

Metalworking • Machining • Plumbing • Decorative Hardware
