

Precision Metal Lathe with Variable Speed Control

This precision metal lathe is designed for small to medium-sized machining tasks. It features a robust cast iron bed for stability, variable speed control for versatility, and a range of threading capabilities.

Overview

Precision Machining Capability

This precision metal lathe is specifically engineered for small to medium-sized machining tasks, offering a robust cast iron bed that ensures stability during operation. With integrated variable speed control, it provides the versatility needed for a wide range of materials and applications. It comes fully equipped with essential accessories including a chuck, tool post, and tailstock, making it a comprehensive solution for hobbyists, model engineers, and small workshops.

Key Features

Capabilities

- Variable speed control
- Threading operations
- Robust cast iron bed construction

Ideal For

Hobbyists, Model Engineering, Small Workshops, Small-Medium Machining

Technical Specifications

Included Components

Chuck • Tool Post • Tailstock
