

Precision Metal Lathe

This precision metal lathe is designed for machining various materials with accuracy and efficiency. It features robust construction, variable speed control, and multiple tooling options for turning, facing, threading, and drilling operations.

Overview

Precision Metal Lathe

This precision metal lathe is engineered for high-accuracy machining across a variety of materials, making it a versatile tool for turning, facing, threading, and drilling. Featuring a robust construction and variable speed control, it provides the stability and flexibility required for professional results. It is an ideal solution for small workshops, educational institutions, and precision-focused hobbyists.

Technical Specifications

Model Identifier	BV20/400
Speed Control	Belt Changing
Power Rating	550 W

Capabilities

Supported Operations	Turning, Facing, Threading, Drilling
----------------------	--------------------------------------

Key Features

Core Advantages

- Robust construction for enhanced stability
- Variable speed control
- Multiple tooling options
- High-precision machining capability
