

Precision Micro Torch for Soldering and Brazing

This precision micro torch is designed for fine soldering, brazing, and heating applications. It features a durable brass body, adjustable flame control, and a swivel nozzle for precise positioning.

Overview

Precision Micro Torch

This precision micro torch is engineered for fine soldering, brazing, and heating applications. Constructed with a durable brass body, it offers reliable performance for intricate tasks. Featuring adjustable flame control and a swivel nozzle, it provides the exact positioning required for professional jewelry making and electronics repair.

Technical Specifications

Construction Material	Brass
Key Features	Adjustable Flame, Swivel Nozzle, Precision Control, Durable Build

Applications

Primary Applications

- Jewelry Making
- Electronics Repair
- Fine Soldering
- Brazing
- Intricate Heating
