

Precision Milling and Drilling Vise

This precision vise is designed for milling and drilling tasks. Constructed from cast iron, it offers adjustable dovetail ways and hardened jaws for secure workpiece positioning.

Product Overview

Precision Milling and Drilling Vise

This precision cross slide vise is engineered for demanding milling and drilling applications, offering exceptional stability and rigidity. Constructed from durable cast iron, it features adjustable dovetail ways that ensure smooth, accurate movement during operation. With hardened and ground jaws for secure workpiece retention and dual handles for precise X and Y axis adjustments, this tool is an essential asset for machining, fabrication, and toolmaking tasks.

Construction & Design

Material	Cast Iron
Key Features	Adjustable Dovetail Ways, Hardened Jaws, Ground Jaws, Dual Handle Adjustment

Operational Capabilities

Axis Adjustment

- X-axis adjustment
- Y-axis adjustment

Suitable Applications

Milling • Drilling • Machining • Fabrication • Toolmaking
