

Precision Milling Machine Cross Slide Table

Precision cross slide table designed for precise milling, drilling, and machining. It allows smooth and accurate movement along X and Y axes via handwheels.

Product Overview

Precision Milling Machine Cross Slide Table

This precision cross slide table is engineered to enhance the versatility and accuracy of your existing machine tools. Designed for demanding milling and drilling operations, it ensures smooth, controlled movement along both X and Y axes via intuitive handwheels. Its sturdy construction provides the necessary stability for reliable performance, while the precision-machined surface allows for secure and stable workpiece clamping.

Technical Features

Key Capabilities

- Smooth X and Y axis movement
- Manual control via precision handwheels
- Sturdy construction for enhanced stability
- Machined surface for secure clamping

Application

Milling, Drilling, Machining Operations
