

Precision Mitre Saw for Wood, Plastic, and Metal

This mitre saw is designed for accurate angle cuts in wood, plastic, and metal. It features adjustable bevel and mitre angles, a blade guard, and a dust extraction port.

Overview

Precision Mitre Saw

This high-precision 255mm mitre saw is engineered for accurate angle cuts in wood, plastic, and metal. Powered by a robust 1350W copper wire induction motor, it delivers reliable performance for professional carpentry and construction tasks. The unit features an aluminum base for stability and includes a dust collection system to maintain a clean workspace.
