

Precision Open Die Forgings

These open die forgings are engineered for superior strength and durability in demanding applications. Machined from quality steel, they offer precise dimensions and a smooth surface finish.

Product Overview

Precision Open Die Forgings

These precision-engineered open die forgings are manufactured to meet stringent quality standards, offering superior strength and durability for demanding industrial applications. Crafted from high-quality materials, they feature precise dimensions and a smooth surface finish suitable for heavy machinery and critical components. This versatile manufacturing solution supports a wide range of industrial needs, from oil and gas equipment to automotive parts.

Manufacturing Capabilities

Forging & Casting Methods	Open Die Forging, Closed Die Forging, Sand Casting, Investment Casting, Die-casting, Gravity Casting, Centrifugal Tubing
Machining Services	CNC Machining and rough forging services available.

Industry Applications

Industries Served

- Oil & Gas
- Automotive
- Heavy Machinery
- Industrial Equipment

Product Range

Oil & Gas Components

Drill Pipe • Casing Accessories • Stabilizers • Pump Parts • Drilling Tools

Automotive Parts

Brake Components • Dampers • Sleeves • Gears • Grinding Axles • Shafts • Spindles • Steel Pins

Forged Parts & Accessories

Rolled Rings • Flanges • Fittings • Rigging Crankshafts • Stainless Steel Rings
