

Precision Optical Lens for Instruments

This optical lens is designed for precision instruments and apparatuses. It ensures optimal light transmission and image clarity, making it ideal for applications requiring accurate optical performance.

Product Overview

Precision Optical Performance

This high-quality optical lens is engineered specifically for precision instruments and apparatuses. It is optimized to ensure superior light transmission and exceptional image clarity, making it an ideal component for professional applications requiring accurate optical performance.

Technical Specifications

Magnification	20 X
Field of View Index	12.5
Lens Type	Wide Field (WF)

Application

Primary Application	Precision Instruments, Optical Apparatus, Scientific Imaging
