

Precision Optical Lens Set for Imaging

Precision-engineered optical lenses designed for various applications in digital cameras and audio-video products. These lenses are crafted from high-quality optical materials, ensuring optimal light transmission and minimal distortion.

Product Overview

Precision Optical Lens Set for Imaging

This professional-grade optical lens set is meticulously engineered for high-performance imaging applications, including digital cameras and advanced audio-video equipment. Utilizing specialized manufacturing techniques such as precise spheronization, grinding, and high-quality coating, these lenses ensure optimal light transmission and minimal visual distortion. The collection features a versatile range of shapes, including plano-convex, plano-concave, cylindrical, and spherical designs to meet exact optical requirements.

Manufacturing Capabilities

Processing Techniques	Drilling, Downfalling, Grinding, Spheronization, Gluing, Coating
Customization	Yes

Technical Specifications

Available Lens Geometries

- Plano-convex
- Plano-concave
- Cylindrical
- Spherical

Surface & Dimension Quality

High Surface Finish • Precise Dimensions • Optimized Transmission
