

Precision Outside Micrometer

This high-precision outside micrometer features a painted frame for durability. It is designed for accurate dimensional measurements in engineering, manufacturing, and quality control applications.

Overview

Precision Outside Micrometer

This high-precision outside micrometer is designed for accurate dimensional measurements in engineering, manufacturing, and quality control environments. Featuring a durable painted frame, it ensures stability and reliability during repetitive measurement tasks. It is available in multiple measurement ranges to suit various industrial requirements.

Technical Specifications

Available Ranges

- 0-25mm
- 25-50mm
- 50-75mm
- 75-100mm

Model Identifier	EK-1602
------------------	---------

Resolution	0.01 mm
------------	---------

Design & Build

Frame Finish	Painted
--------------	---------

Ideal Applications	Engineering, Manufacturing, Quality Control
--------------------	---
