

Precision Paper Cutter with Ruled Grid

This precision paper cutter is designed for accurate and efficient trimming. The base includes a ruled grid for precise measurements and alignment, ensuring professional results.

Product Overview

Precision Cutting Solution

This precision paper cutter is engineered for accurate and efficient trimming of various materials, including paper and cardstock. It features a self-sharpening blade mounted on a smooth sliding track to ensure consistent, clean cuts every time. The base is equipped with a ruled grid, facilitating precise measurements and alignment for professional-grade results in office, crafting, and educational environments.

Technical Specifications

Blade Mechanism	Self-sharpening blade
Cutting System	Sliding track
Alignment Features	Ruled grid, Measurement markings

Applications

Compatible Materials

- Paper
- Cardstock

Ideal For

Office • Crafting • Educational
