

# Precision Pruning Shears

These pruning shears are designed for precision cutting in gardening and landscaping. They feature durable construction and sharp blades for clean cuts.

## Product Overview

### Professional Precision Pruning Shears

These precision pruning shears are engineered for professional landscaping and gardening applications. Featuring high-grade Japanese SK5 steel blades, they ensure clean, accurate cuts for optimal plant health. The ergonomic aluminum handle with a durable PVC coating is specifically designed to reduce fatigue during continuous, intensive use.

## Technical Specifications

Blade Material	Japanese SK5 Steel
Recommended Cutting Diameter	15 mm
Adjustment Features	Precision Blade Adjustment, Counterblade Adjustment, Shock Absorbers

## Design & Ergonomics

### Handle Construction

- Ergonomic Aluminum
- Orange PVC coating

### Primary Applications

Professional Landscaping • Gardening • Continuous Use
