

Precision Spraying Device for Medical/Dental Use

This precision spraying device is designed for targeted application. It features a slender, curved nozzle and a control mechanism for dispensing liquids or powders.

Product Overview

Professional Precision Spraying System

This precision spraying device is engineered for clinical accuracy in medical and dental environments. Its slender, ergonomic design allows for highly targeted application of liquids or powders, ensuring minimal waste and maximum efficacy. The metallic construction provides both durability and high-level hygiene standards required for sensitive medical procedures.

Primary Applications	Medical Clinical Use, Dental Procedures, Precision Dispensing
-----------------------------	---

Technical Features

Control System	Blue-accented precision control module
Nozzle Geometry	Slender, curved for targeted access
Construction Material	Clinical-grade metallic finish
