

Precision Surface Grinding Machine

This precision surface grinding machine is designed for high-accuracy material removal. It features robust construction for stability and vibration damping, ensuring consistent grinding performance.

Overview

Precision Performance

The YH-006 is a high-accuracy surface grinding machine engineered for consistent material removal and superior surface finish. Its robust construction ensures exceptional stability and vibration damping during operation, making it ideal for demanding industrial applications. Equipped with a versatile grinding head and a precision traversing table, this machine offers the control and reliability required for professional-grade results.

Technical Specifications

Model Number	YH-006
Key Features	High-Accuracy, Vibration Damping, Coolant System, Robust Construction

Operational Capabilities

Motion Control

- Vertically adjustable grinding head
- Horizontally traversing table

Safety and Control

User-friendly controls • Integrated safety features
