

Precision Test Probe with Sharp Tip

Precision test probe designed for accessing small test points and surface mount components. It features a durable insulated body and a secure connection for reliable measurements.

Product Overview

Precision Test Probe with Sharp Tip

This precision test probe is designed for accessing small test points and surface mount components with ease. Featuring a durable insulated body and a secure connection mechanism, it ensures reliable measurements during electronics testing, troubleshooting, and repair tasks. It is fully compatible with standard multimeter test leads, making it an essential tool for professional electronics work.

Technical Specifications

Tip Design	Sharp Tip
Compatibility	Standard Multimeter Leads, Surface Mount Components
Body Material	Durable Insulated Body

Key Features

Primary Applications

- Electronics testing
- Troubleshooting
- Repair applications
- Surface mount component access
