

Precision Tool Grinding Machine with Vertical Wheel

This precision tool grinding machine is designed for accurate sharpening and shaping of cutting tools. It features a robust construction, a vertically oriented grinding wheel, and an integrated control panel.

Overview

Precision Tool Grinding Machine

This specialized grinding machine is engineered for the accurate sharpening and shaping of industrial cutting tools. Featuring a robust, stable cabinet base and a vertically oriented grinding wheel, it provides exceptional control for critical maintenance tasks. Designed for workshops and manufacturing environments, it includes an integrated control panel, pressure monitoring, and an adjustable work light to ensure optimal performance and visibility.

Technical Features

Grinding Orientation	Vertical
Monitoring	Pressure Gauge, Integrated Control Panel
Workplace Lighting	Yes

Construction

Base Construction	Sturdy cabinet base
-------------------	---------------------

Application

Ideal Environments

- Professional Workshops
- Manufacturing Facilities
- Tool Maintenance Departments
