

Precision Vernier Caliper for Dimensional Measurement

These vernier calipers are designed for precise measurement of outside diameter, inside diameter, depth, and steps. The calipers are constructed from hardened stainless steel for increased durability.

Product Overview

Precision Dimensional Measurement

These professional-grade vernier calipers are constructed from hardened stainless steel for long-term durability in industrial environments. Engineered for versatile use, they provide accurate measurements for outside diameters, inside diameters, depth, and steps. With both Open Block and Mono Block configurations available, as well as specialized left-handed models, these calipers cater to diverse user preferences and technical requirements.

Technical Specifications

Measurement Performance

Graduation	Accuracy
0.02mm / .001"	±0.03mm to ±0.04mm
0.05mm / 1/128"	±0.05mm to ±0.06mm

Measuring Range 0-100mm, 0-150mm, 0-200mm, 0-300mm

Material Hardened Stainless Steel

Configurations

Design Options

Open Block • Mono Block • Right-handed • Left-handed
