Product Overview

High-Precision Industrial Measurement

These precision vernier calipers are engineered for exacting measurement tasks across industrial and engineering sectors. Designed to deliver reliable results for inner diameters, outer diameters, depths, and steps, they provide the versatility required by professionals. Available in multiple configurations including digital, dial, and adjustable vernier types, each unit is built for smooth operation and long-term durability.

Technical Specifications

Available Sizes

- 100mm
- 150mm
- 200mm
- 300mm

Caliper Types

Digital • Dial • Adjustable Vernier

Available Materials

Carbon Steel, Stainless Steel

Key Features

IP Rating	IP54 (Water Resistant)
Data Transfer	Yes
Connection Interface	USB
