

Precision Vernier Caliper

This precision vernier caliper is designed for accurate measurements. It features durable stainless steel construction, metric and inch scales, and a fine adjustment screw.

Product Overview

Professional Precision Vernier Caliper

This professional-grade vernier caliper is designed for high-accuracy dimensional inspection in engineering, machining, and quality control environments. Featuring a durable carbon steel construction with a chrome-plated finish, it ensures long-lasting performance and corrosion resistance. The tool supports versatile four-way measurements, covering internal, external, depth, and step dimensions.

Measurement Specifications

Measurement Range

150 mm
Metric Range

6 in
Imperial Range

Accuracy

0.05 mm
Metric Accuracy

0.0078 in
Imperial Accuracy

Physical Properties

Material	Carbon steel, chrome plated
Capabilities	Internal, External, Depth, Step

Packaging

Packaging	Plastic case with color sleeve
