

Precision Wire Stripping and Cutting Machine

This precision wire stripping and cutting machine processes a wide range of wire types and sizes. It features a user-friendly interface for setting parameters such as stripping length, cutting length, and speed.

Overview

Precision Wire Processing Solution

This fully automatic wire stripping and cutting machine is designed to deliver high-precision performance for diverse cable assembly requirements. With intuitive parameter controls for length and speed, it streamlines production in electronics and automotive wiring sectors. Built-in safety features, including an emergency stop and protective housing, ensure reliable operation in professional manufacturing environments.

Key Performance Metrics

1 Full Auto

Operational Mode

Features

Key Features

Precision Stripping, Automatic Feeding, Emergency Stop, Adjustable Speed, Protective Housing

Applications

Suitable Industries

- Cable Assembly
- Electronics Manufacturing
- Automotive Wiring
