Prefabricated Substation Enclosure with Pyramid Texture

This prefabricated substation enclosure has a light gray exterior and a four-sided pyramid textured body. It is designed to house electrical equipment in a secure and weather-resistant environment.

Product Overview

Prefabricated Substation Enclosure

This prefabricated substation enclosure is designed to provide a secure, weather-resistant housing for critical electrical equipment. Featuring a distinctive four-sided pyramid textured body in a light gray finish, it offers both structural durability and aesthetic appeal. The design includes essential features such as integrated ventilation grilles, double-door access with recessed handles, and a robust base, ensuring reliable protection in various environmental conditions.

Design and Aesthetics

Exterior Texture	Four-sided pyramid texture
Color Scheme	Light Gray Body, Dark Base
Material	GRC (Glass Reinforced Concrete)

Structural Features

Access Type	Double doors with recessed handles
