

# Pressed Steel Cable Spool Bobbin for Wire and Cable

This pressed steel bobbin is designed for winding and managing steel wire cable and copper wire. It features robust construction ensuring durability and efficient cable management.

## Product Overview

### Industrial Steel Cable Spools

These robust pressed steel cable spools are engineered for heavy-duty industrial wire and cable management. Available in corrugated, double-layer high-speed, and flat high-speed series, they accommodate diverse applications ranging from large PVC tube rolling to precision wire drawing and stranding. The professional-grade construction ensures durability for one-way shipping or continuous in-plant processing.

## Series and Availability

### Available Nominal Sizes (mm)

- 300
- 400
- 500
- 630
- 800
- 1000
- 1250
- 1400
- 1600
- 1800
- 2000
- 2240
- 2400
- 2800
- 3150

### Available Series

Corrugated Steel Series, Double Layer High Speed Series, Flat High Speed Series

## Industrial Applications

### Primary Applications

- Large cable and welding wire handling
- PVC tube and pipe rolling
- Wire and cable stranding and bunching
- Copper and aluminum wire drawing
- Annealing, enameling, and tinning processes

## Market Reach

### Export Markets

Brazil • Uzbekistan • Tunisia • Turkey • Iran • Iraq • Indonesia • Malaysia • Thailand • Vietnam • Philippines • Korea • India
