

Pressure Regulating Switch for Water Pumps

This pressure control switch regulates water pump operation according to system pressure. It has adjustable pressure settings and a manual on/off/auto lever for flexible operation.

Product Overview

Professional Water Pump Pressure Control

This pressure regulating switch is engineered to provide precise automated control for water pump systems based on real-time line pressure. Designed for durability and operational flexibility, it allows for adjustable pressure settings to meet diverse residential, commercial, and agricultural requirements. The inclusion of a manual on/off/auto lever ensures seamless system management and safety.

Technical Specifications

Pressure Operating Range

20 PSI

Lower Limit

170 PSI

Higher Limit

Operating Modes

OFF, AUTO, Manual

Features

Suitable Applications

- Residential water systems
- Commercial pumping installations
- Agricultural irrigation and water supply

Construction Details

Robust Housing • Threaded Connection • Adjustable Settings
