

Pressure Switch

This pressure switch monitors pressure levels in various applications. It features a robust construction with a brass fitting and a durable electrical connector.

Overview

Professional Pressure Monitoring Solution

This compact pressure switch is engineered for reliable performance in hydraulic and pneumatic control systems. Featuring a robust brass fitting and durable electrical connector, it ensures consistent operation across a versatile voltage range. The unit is factory pre-set for precision monitoring, making it an ideal choice for critical pressure control applications.

Technical Specifications

Pressure Settings

15 PSI

Open Pressure

35 PSI

Close Pressure

Catalog Number	LPS 15
Voltage Compatibility	24 VAC, 120 VAC, 240 VAC

Construction

Materials and Design

- Brass fitting construction
- Durable electrical connector
- Compact design

Applications

System Compatibility

Hydraulic Systems • Pneumatic Systems
