

Pressure Washer Lance with Adjustable Nozzle

This high-pressure washer lance features an ergonomic handle and durable metal construction. It is designed for compatibility with various pressure washer models, providing extended reach and efficient dirt removal.

Overview

Professional Cleaning Performance

This high-pressure washer lance is engineered for versatility and durability in demanding cleaning environments. It features a robust metal construction coupled with an ergonomic handle to ensure comfort during extended operation. With an integrated adjustable nozzle and a convenient quick-connect system, it provides professional-grade control for various high-pressure cleaning applications.

Technical Specifications

Key Features

- Ergonomic handle design
- Quick-connect attachment system
- Controlled trigger mechanism
- Extended reach lance

Construction Material	Durable metal
Nozzle Type	Adjustable
Application Compatibility	High-Pressure, Versatile, Professional Grade
