

Pressurized Gas/Liquid Tank

This tank is designed to hold pressurized gas or liquid. It serves as a hardware component for applications requiring containment.

Product Overview

Pressurized Storage Solution

This pressurized tank is designed for the secure containment of gases or liquids in industrial or commercial environments. Featuring a durable white exterior, it is suitable for applications requiring reliable pressure management. The unit is engineered to meet standard operational requirements for fluid and gas storage.

Technical Specifications

Tank Type	Pressurized Gas/Liquid Tank
Finish	White
Visible Markings	vid, DINACEL
