

Pressurized Steam Cleaner for Surface Disinfection

This steam cleaner is designed for efficient and hygienic cleaning using pressurized steam. It removes dirt, grime, and bacteria from surfaces without harsh chemicals, and includes multiple attachments for targeted cleaning.

Product Overview

Professional Surface Sanitization

The Pressurized Steam Cleaner provides a chemical-free solution for professional surface disinfection and deep cleaning. Engineered for efficiency, it utilizes high-pressure steam to effectively eliminate dirt, grime, and bacteria across diverse surface types. The unit features rapid heating capabilities and ergonomic design elements to support high-frequency use in demanding cleaning environments.
