Product Overview

High-Performance PK Belt

This high-performance PK belt is engineered for precise power transmission and smooth, reliable operation in demanding environments. Constructed from durable, high-quality EPDM rubber, the belt offers exceptional resistance to heat, oil, and abrasion, ensuring long-lasting performance. Its multi-rib design provides enhanced grip and minimizes slippage, making it an ideal solution for maintaining optimal functionality in printer systems and automotive applications.

Technical Specifications

Available Specifications

- 4PK1120
- 6PK1120

Material	EPDM Rubber
Belt Type	PK Belt (Multi-ribbed)

Features & Benefits

Performance Highlights

1120 mm
Belt Length

Key Properties	Heat Resistant, Oil Resistant, Anti-Static, Abrasion Resistant
