Product Overview

Professional Lifting Solution

This Printing Plate Lifting Chain Assembly is engineered specifically for the rigorous demands of plate making and printing machinery environments. Designed for secure handling and suspension, the assembly features a durable master link connected to dual chain legs for balanced lifting. It provides a reliable method for maneuvering heavy components within the printing production process.

Technical Specifications

Design Features

- Oblong master link
- Dual-leg chain configuration
- Interconnected oval links
- Integrated identification tag

Component Type

Lifting Chain Assembly

Primary Application

Plate Making Machinery, Printing Machinery, Industrial Lifting
