

Professional Audio Speaker System with Dual Subwoofer

This high-performance audio speaker system is designed for professional sound reinforcement. It features a dual 18" subwoofer and a 15" two-way speaker for balanced audio output.

Product Overview

Professional Performance Audio System

This professional audio speaker system is engineered for high-performance sound reinforcement in demanding environments. Constructed with imported birch plywood and finished with a high-intensity surface treatment, the system offers exceptional durability and acoustic integrity. The configuration includes a powerful dual 18-inch subwoofer alongside a 15-inch two-way speaker, delivering balanced audio output and super clear sound pressure suitable for live performance applications.
