

Professional Chainsaw for Tree Felling and Firewood Cutting

This high-performance chainsaw is designed for professional use. It features a powerful engine suitable for demanding cutting tasks like felling trees and cutting firewood.

Product Overview

Professional Cutting Power

This high-performance chainsaw is engineered specifically for demanding professional tasks including tree felling, limbing, and firewood preparation. Its robust construction ensures exceptional reliability and durability when operating in the most challenging outdoor environments. Designed with operator comfort in mind, the ergonomic build helps to minimize fatigue during extended use, while integrated safety systems ensure secure operation for both commercial and residential applications.

Model Identifier

Z 365

Key Features

Safety Standards
