

Professional Communication Endpoint with Touchscreen

This personal endpoint communication device is designed for professional use, featuring a touchscreen interface and handset. It is suitable for office environments, providing a user-friendly experience for managing calls and other communication tasks.

Product Overview

Professional Communication Endpoint

This professional communication endpoint combines advanced telephony with a sleek, intuitive 7-inch TFT touchscreen interface. Designed to streamline business workflows, it supports seamless transitions between voice and video calls while providing easy access to web applications and multimedia content. Its versatile design allows for both corded and cordless operation, making it an ideal solution for modern office environments.
