

Professional Film Projector for Broadcast Studios

This professional film projector is designed for radio and television broadcasting, featuring a robust construction for continuous operation. Equipped with controls for focus, framing, and sound synchronization, the projector ensures optimal playback quality and supports standard film formats.

Product Overview

Professional Broadcast Projection

This professional-grade film projector is engineered for the demanding environments of radio and television broadcasting. It combines robust build quality for continuous, reliable operation with a high-precision optical system to deliver exceptional image clarity. Designed for versatility, it is an ideal solution for broadcast studios, post-production workflows, and archival preservation projects.

Technical Specifications

Operational Controls

- Precision focus adjustment
- Framing control
- Advanced sound synchronization

Performance Metrics

1 Continuous

Operation Mode

Core Components

Component	Function
Lamphouse	High-intensity illumination
Optical System	Sharp image projection
Transport Mechanism	Reliable film handling

Certification

Broadcast Ready • Professional Grade

Recommended Applications

Broadcast Studios, Post-production Facilities, Archival Applications
