

Professional Film Projector for Broadcasting

This professional film projector is designed for radio and TV broadcasting applications. It features a high-intensity lamp, precision optics, and a reliable film transport mechanism.

Product Overview

Professional Broadcasting Projection

This professional film projector is engineered specifically for radio and television broadcasting environments. It features a high-intensity lamp and precision optics to deliver exceptional image clarity and sharpness. Built for reliability, the robust film transport mechanism ensures smooth operation during critical broadcast applications or archival screenings.

Technical Specifications

Key Capabilities

- High-intensity lamp for broadcast-grade brightness
- Precision optics for superior image resolution
- Reliable film transport system
- Adjustable focus and framing controls
- Advanced sound synchronization

Applications

Radio Broadcasting, TV Broadcasting, Cinema Presentations, Archival Screenings
