

# Professional Hair Clipper with Adjustable Blade

This professional hair clipper features a high-performance motor for efficient and precise cutting. It includes a durable blade with adjustable settings for various hair lengths and a digital display indicating battery level and cutting speed.

## Product Overview

### Professional Performance and Precision

This professional-grade electric hair clipper is designed for efficiency and durability, featuring a high-performance DC motor and a long-lasting 2000mAh lithium battery. With a versatile cord or cordless function and an adjustable cutting height of 0.8mm to 2.0mm, it offers precision control for various grooming needs. The device includes a ceramic moving blade and high-density titanium alloy steel for long-term sharpness, making it a reliable tool for both professional and home use.
