

Professional Hair Steamer with Wheeled Base

This professional hair steamer features adjustable height and a rotating hood. Its design incorporates a water reservoir for steam generation, temperature control settings, a timer, and a wheeled base for mobility, making it suitable for salon or home use to enhance hair treatments and conditioning.

Product Overview

Professional Hair Steamer

This professional-grade hair steamer is designed to enhance hair treatments and deep conditioning processes in both salon and home environments. It features a specialized water reservoir for consistent steam generation, paired with adjustable temperature and timer controls for precise treatment management. The unit is built for convenience, featuring an adjustable height mechanism, a rotating hood, and a sturdy wheeled base for easy mobility.
