

Professional Hair Straightening Iron with Digital Temperature Control

This professional hair straightening iron features ultra-titanium plates to distribute heat evenly for smooth, shiny hair. It offers a rapid 30-second heat-up and digital temperature control with settings from 80-230°C.

Product Overview

Professional Hair Straightening Iron

This professional-grade hair straightening iron features ultra-titanium plates designed for even heat distribution, ensuring silky, smooth, and shiny results. Equipped with advanced digital touch controls and a rapid 30-second heat-up time, it offers precision styling for various hair types. The device prioritizes safety and usability with dual NTC and PCB temperature control, an ergonomic handle, and a tangle-free 360-degree swivel cord.
