

Professional Interphone Pager Communication Device

This professional-grade interphone pager is designed for reliable communication. The robust device features durable construction and clear audio transmission.

Overview

Professional Communication Solution

This professional-grade interphone and pager device is engineered for reliable communication in demanding environments. Featuring a robust and durable construction, it delivers clear audio transmission and reception for critical operations. Designed with an ergonomic form factor, it is an ideal choice for security, construction, and emergency response teams requiring consistent performance.

Technical Specifications

Key Features

- Durable construction
- Clear audio transmission
- Intuitive controls
- Extended communication range
- Compact ergonomic design

Antenna System	High-gain antenna
Target Applications	Security, Construction, Emergency Response

Performance

Battery Life	Long-lasting for prolonged operation
