

Professional Loudspeaker Driver

This high-performance loudspeaker driver is designed for professional audio applications. Its robust construction features a rigid frame, a durable cone material, and a powerful motor structure.

Overview

Professional Performance Audio Driver

This high-performance loudspeaker driver is engineered for demanding professional audio environments, offering a combination of robust construction and precise sound reproduction. Featuring a rigid frame and a durable cone material, it minimizes distortion while maintaining exceptional clarity and dynamic range. It is an ideal choice for integrating into professional studio monitors, high-output PA systems, and premium home audio setups.

Technical Features

Key Design Features

- Robust rigid frame construction
- Durable cone material for accuracy
- High-power motor structure
- Low distortion output

Applications

Compatible Systems

Studio Monitors, PA Speakers, Home Audio

Performance

Sonic Characteristics

High Clarity • High Dynamic Range • Accurate Reproduction
