

Professional Loudspeaker with Bluetooth and USB

This professional-grade loudspeaker features Bluetooth, USB, and aux input. The speaker is designed for clarity, power, and coverage, suitable for live sound reinforcement and installed sound systems.

Overview

Professional High-Performance Audio

This professional-grade loudspeaker is engineered for high-performance audio applications, delivering exceptional clarity and power. It features advanced DSP sound effects and versatile input options including Bluetooth and USB for modern connectivity. Designed for both portable use and permanent installations, it ensures reliable and impactful audio reproduction for live sound, DJ setups, and reinforcement systems.

Key Features

Core Features

Bluetooth Connectivity, USB Playback, Aux-Input, DSP Sound Effects, Quiet Cooling Fan

Performance Metrics

Output Power

900 W

Peak Power

Technical Specifications

Impedance	4 Ω
Frequency Response	35Hz - 20KHz
Sensitivity	98 \pm 3 dB

Hardware & Drivers

Drive Unit Configuration

- 1.5" Tweeter
- 15" Woofer

Connectivity

Input Options

- Bluetooth
- USB Port
- Aux-Input
- Two-Way Mix Input
