

Professional Mist Generator for Pest Control and Special Effects

This professional mist generator is designed for efficient fog generation. It features adjustable settings for controlling fog density and a high-capacity tank for extended use.

Overview

Versatile Professional Mist Generation

This professional-grade mist generator is engineered for dual-purpose utility, serving both pest control and special effects applications. It utilizes high-performance pulse power to deliver long-range misting coverage while maintaining efficiency in chemical usage. Designed for portability and ease of use, it is an ideal tool for large-scale disinfection and atmospheric requirements.
