

Professional Stage Speaker

This stage speaker is designed for professional audio environments. It provides high-quality sound projection for live performances and large venues.

Product Overview

Professional Performance Overview

The SC 70 is a professional-grade single-stage centrifugal water pump engineered for high-efficiency liquid transport. Designed with a robust, direct-coupled motor and durable housing, it ensures consistent reliability in demanding operational environments. This versatile unit is ideal for water circulation, pressure boosting, and various general water transfer applications.

Technical Specifications

Core Design

- Direct-coupled motor
- High-durability housing
- Optimized for water circulation
- Suitable for pressure boosting

Model Identifier	SC 70
Pump Architecture	Single-stage centrifugal
Operational Capabilities	Water Transfer, Pressure Boosting, Circulation, Heavy Duty
