

Professional Tire Changer for Automotive Workshops

This professional tire changer is designed for efficient and safe tire removal and installation. It features robust construction for durability and is ideal for handling a wide range of tire sizes in automotive workshops.

Overview

Professional Tire Changer

This professional-grade tire changer is designed specifically for high-efficiency automotive workshops. It features a pneumatically operated tilting column and a robust construction to handle stiff, wide, and low-profile tires with ease. With an integrated assist arm and a tubeless tire inflation system, it ensures precision, safety, and productivity for demanding tire service environments.

Technical Specifications

Key Features
