

Programmable Drip Coffee Maker with Thermal Carafe

This coffee maker features a programmable timer for automatic brewing and an aroma function to enhance the coffee flavor. It includes a thermal carafe to keep coffee hot for extended periods.

Overview

Professional Programmable Brewing

This 1.25L programmable drip coffee maker is designed for efficiency and convenience, capable of brewing 12-15 cups per cycle. It features a high-quality double-walled stainless steel thermal carafe to maintain optimal serving temperatures without the need for a hot plate. With integrated digital controls, including a timer and aroma selection, this machine offers a versatile brewing experience suitable for office or home environments.
