

Protective Metal Shell with Mounting Holes

Durable metal shell designed for robust protection and structural support in diverse applications. It is precision-engineered with mounting holes for secure attachment in industrial, electronic, and mechanical assemblies.

Product Overview

Robust Protective Housing

This protective metal shell is precision-engineered to provide reliable structural support and robust protection for a wide range of industrial, electronic, and mechanical assemblies. Designed with integrated mounting holes, it ensures secure attachment and easy installation in demanding environments. Constructed from high-quality materials, the shell offers excellent resistance to wear and tear, ensuring long-term durability for your applications.

Design & Construction

Material Durability

High-quality material • Wear-resistant • Durable construction

Mounting Features

Integrated mounting holes for secure attachment

Applications

Suitable Use Cases

- Industrial assemblies
- Electronic enclosures
- Mechanical housings
