

Protective Safety Glasses

These safety glasses shield eyes from impact, dust, and chemical splashes. They feature clear, scratch-resistant lenses and adjustable straps for optimal visibility and a secure fit.

Product Overview

Professional Protective Safety Glasses

These protective safety glasses are designed to offer superior eye protection in demanding work environments such as construction, manufacturing, and laboratory settings. They feature a tough polycarbonate lens that provides high impact resistance against flying particles. The integrated vented body and flexible PVC frame ensure long-lasting comfort, even when worn over personal prescription spectacles.
