

Protective Undercoat and Rustproofing Spray

This product forms a protective film that prevents rust and corrosion on metal and rubber surfaces. It resists wear and corrosion caused by climate and industrial pollutants.

Product Overview

Professional Protective Undercoat

This high-performance undercoat and rustproofing spray is engineered to form a robust, protective film on vehicle undercarriages. It provides long-lasting resistance against corrosion caused by harsh climates and industrial pollutants. Designed for both metal and rubber surfaces, this solution ensures superior durability and vehicle protection.

Technical Specifications

Net Weight	1000 g
Protection Duration	5 years

Application

Key Benefits

- Prevents rust formation
- Corrosion resistance
- Resists wear
- Protects against climate pollutants

Suitable Surfaces	Metal, Rubber
